Total cost of underlying portfolio	0.64%

There will be an additional 0.25%pa charge (no VAT) if LGT Wealth Management are asked to act as custodian and a third party platform is not used.

Portfolio objectives

The objective of the portfolio is to achieve growth above the rate of inflation over the medium to longer term, (5 years plus). Whilst the diverse asset mix may help to limit fluctuations in the value of the portfolio, the increased level of equity exposure (relative to the cautious and balanced portfolios) is likely to mean that this portfolio will experience higher levels of fluctuation in value.

Portfolio description

The portfolio targets higher levels of capital growth (than the cautious and balanced portfolios) and for this growth to be in excess of the rate of inflation over the medium to longer term by investing across a diverse portfolio of assets including but not limited to equities, fixed income, such as bonds and gilts, absolute return, alternate investments and cash. The assets may be UK or international and the investment strategy will result in fluctuations in the portfolio's value with these fluctuations likely to be more than in the cautious and balanced portfolios.

Quarterly investors report

In March, equity markets continued to post strong performance in the month, with the S&P 500, the EuroStoxx 600 and the Nikkei 225 all registering gains. But the top performer in March was the FTSE 100, as increases in oil prices and other commodities helped push the resource-heavy index higher.

Investors found reassurance from the Federal Reserve Chair Jerome Powell's remarks on inflation, which eased concerns, signalling a potential for three rate cuts this year. Across the Atlantic, the ECB hinted at upcoming rate cuts in June, contrasting with the Bank of England's decision to maintain rates at 5.25%, albeit with hints of future easing.

The most important central bank activity last month came from the East, with the Bank of Japan (BoJ) abandoning its negative interest rate policy and altering its asset purchasing programme. This was the first time the BoJ raised rates in 17 years.

Overall, global stock markets rallied, reflecting growing confidence in a soft landing. Nonetheless, the persistence of high interest rates underscored the importance of resilient businesses.

Performance

	Performance
1 month	2.32%
3 months	4.39%
6 months	9.56%
1 year	8.89%
Since inception	35.63%

Net of underlying fund costs, gross of all other charges. *Source: Figaro. Fixed income considered saving income, all other asset classes (bar cash) considered dividend income.

Important information

LGT Wealth Management's fees for the management of model portfolios should be VAT exempt and it treats such fees accordingly. However, the firm is aware that the VAT liability of model portfolio management services is due to be reviewed by HM Revenue & Customs. If it is determined that such services should be subject to VAT, it will be necessary for LGT Wealth Management to add VAT to its fees.

The performance of actual portfolios linked to this Model Portfolio may differ from the performance of the Model Portfolio shown herein due to certain funds contained in the Model Portfolios not being made available for investment into actual portfolios by some investment platforms, the variation in timing of the initial investment or rebalancing differences resulting from minimum transaction size limits on the investment platform.

The Model Portfolio Service is not a financial instrument. The portfolio will consist of financial instruments, which when considered together as the Model Portfolio Service have a target market consistent with the needs of retail clients. This publication is marketing material. It is for information purposes only. The information presented herein is for illustrative purposes only and does not provide sufficient information on which to make an informed investment decision. This document is not intended and should not be construed as an offer, solicitation or recommendation to buy or sell any specific investments or participate in any investment (or other) strategy. It is recommended that potential investors should seek advice concerning the suitability of any investment from their Financial Adviser. Potential investors should be aware that past performance is not an indication of future performance and the value of investments and the income derived from them may fluctuate and they may not receive back the amount they originally invested. The tax treatment of investments depends on each investor's individual circumstances and is subject to changes in tax legislation. The performance of actual portfolios linked to this Model Portfolio may differ from the performance of the Model Portfolio shown herein due to the variation in timing of the initial investment or rebalancing differences resulting from minimum transaction size limits on the investment platform. The Ongoing Charge Figure is variable and is for example purposes only.
